Press Release

NFSI – has certified the turbolava[®] Scrubber/Vacuum as its first piece of cleaning Equipment that truly does more than just clean floors. After a through evaluation in a “real - world” condition on hard surface floors including grouted ceramic tile floors. The portable automatic turbolava[®] floor scrubber has proven again that you cannot mop a floor clean. Test results show that the wet (SCOF), Slip co-efficiency of a wet surface was improved by 25% when utilizing the turbolava[®]. The turbolava[®] uses two speciality-designed brushes to scrub the grout and floor. The soiled solution is picked up rather than rinsed out in your mop and bucket and truly have a floor that is Clean, Dry and Safe. Fortune 500 companies are looking for NFSI certified products to help reduce their liabilities.
